

PT Tracker Series

GPS Asset and Trailer Tracking Systems

Power Telematics offers three easy to install GPS tracking systems to outfit any mobile asset and equipment. The PT Tracker Series units are designed to 'ping' each asset twice per day to update location with frequency being customizable based on your needs. Track real-time speeding alerts as well as create geo-fences. Each tracker is powered by internal, swappable Lithium Cell batteries and has battery life monitoring, so you know when to change them. All events are logged and reported to the Power Link online portal. Best of all, the PT Tracker Series monitors are backed by a lifetime warranty.

➔ **Recommended Applications:**
Any mobile asset or equipment.

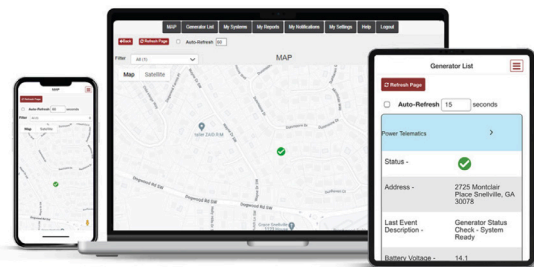

All PT Tracker Series systems monitor a set of standard conditions including:

- GPS Location
- Speed Tracking
- Battery Level Monitoring

Tracker Features include

- PT-TTS, PT-Mini, or PT-Micro Tracking System
- Internal Cellular & GPS Antennas
- Multi-Carrier Modem & Connection
- Over-The-Air Unit Configuration and Updates
- Waterproof Enclosures
- Internal, Swappable Batteries
- Easy Bolt-On Installation
- Theft Recovery Mode
- Geo-Fence Capabilities

User Interface: Power Link

Power Link is your online tool for keeping up to date with generator status, activity, readiness and more. Dive into the generator history, create reports, and manage alert notifications all from your desktop or mobile phone. Power Link has a downloadable app so you can check in at any time.
