

Power Telematics, Inc. Monitoring Data & Platform Service Policy

Power Telematics, Inc. sells and provides 12 months of monitoring data and platform service with each monitoring or tracking device sold. The monitoring and tracking devices are shipped pre-activated and pre-programmed for the convenience of our clients and to simplify the installation process. Please note that the 12 months of monitoring data and platform service begins at the time of installation or one (1) year from the date of shipment, whichever comes first. Should the monitor not be installed after the full two (2) year period of possession, the monitoring service will be expired and will either need to be renewed or cancelled.
