

Power Telematics ModPro Readings

Kohler DEC3000/APM402

Alarms		
Generator Failed to Exercise	Low Battery Voltage Alarm	Over Crank Shutdown
Generator On/Running	Low Coolant Level Alarm	High Engine Temperature Alarm
Generator Running for 90 Minutes	Generator Supplying Load	High Engine Temperature Alarm Warning
Generator Running 4 Hours	Over Speed Alarm	Low Temperature Alarm
Generator Running 8 Hours	Utility Supplying Load	System Ready
Generator Running 12 Hours	Generator Shutdown	Fuel Level Below 50%
Generator Running 24 Hours	Generator Switch in Auto	Fuel Level Below 25%
Low Oil Pressure Warning	Generator Switch Not in Auto	Fuel Level Below 10%
Battery Charger Fault Alarm	Generator Switch Not in Auto 4 Hours	Fuel Leak Detected
Common Warning	Low Oil Pressure Alarm	Low Fuel Level Alarm
E-Stop Closed/Activated		

Analog Values		
Generator Average Voltage L-L	Generator Total KW	Generator Total KVA
Generator Average Voltage L-N	Generator Voltage L1-L2	Battery Voltage
Generator Average Current	Generator Voltage L1-L2	Coolant Temperature
Generator Average Voltage	Generator Voltage L2-L3	Engine Hours
Parameter: Generator Current L1	Generator Voltage L3-L1	Oil Pressure
Parameter: Generator Current L2	Generator Voltage L1-N	Engine RPM
Parameter: Generator Current L3	Generator Voltage L2-N	Fuel Level
Generator Frequency	Generator Voltage L3-N	Total KW Rating Percentage
